APERTURE & SHUTTER SPEED ISOLATIONINTIMACY TIMEMEMORY

NAME: **PHOTO I**

Shoot a roll of 24 images that explore the creative use of aperture and shutter speed.

APERTURE: You will use short depth of field to create a feeling of closeness or intimacy with your subject and great or deep depth of field as a way to create a feeling of isolation or loneliness. Consider placing your subject near and far in space. You may also try using great DoF to create intimacy and short DoF to create isolation. You will need examples of shallow depth of field (small f/stop) and great depth of field (large f/stop) in your contact sheet.

SHUTTER SPEED: Explore time and memory in your photographs by using a fast shutter speed to freeze movement and a slow shutter speed to blur movement. Consider how freezing and blurring some action is also freezing or extending time or a memory and something that is only possible in the world of photography. You will need examples of frozen action (fast shutter speed) and blurred action (slow shutter speed, usually below 125) in your contact sheet. You can also try panning, set your camera to a slow shutter speed (below 1/30) and follow a moving subject while pressing the shutter button.

Teacher	/25	/25	/25	/25	/100

Exemplary 22.5-25 — Good 20-22 — Satisfactory 17.5-19.5 — Needs Improvement 15-17 — Unsatisfactory 0-14.5

Comments:

I. This assigni printing? Be	ment deals with technical aspects of the camera.What did you <u>do well</u> with technical light metering, exposure, and e specific.
2. What do yo	ou need to improve on with technical light metering, exposure, and printing? Be specific.
3. Give one e	xample of how you explored intimacy with the use of aperture.
4. Give one ex	xample of how you explored isolation with the use of aperture.
5. Give one e	xample of how you explored time with the use of shutter speed.
6. Give one e	xample of how you explored memory with the use of shutter speed.
7. What do yo	ou need to improve on in your creative use of aperture and shutter speed?
8. What inter	rests you about aperture and shutter speed that you feel you will explore further in later assignments?
